Honeycomb – Product information

Honeycomb is a colour woven polyester fabric inspired by architectural structures found in nature and copied by man. The hexagonal shapes of the beehive have long been imitated for their strength and uniformity. Natural engineering at its best.

Honeycomb is available in 16 colour mixes. The bolder shades of the pattern outline are softened with a stria of coloured threads.

Honeycomb is ideal for high performance upholstery, especially when combined with stain repellent, antibacterial, waterproof and flame retardant coatings. These treatments can be applied on request. Minimum order quantities and charges will apply.
